BQE Software Unveils the New ArchiOffice

Delivers ArchiOffice as a web-based application harnessing the power of mobile devices

TORRANCE, CA — August 6, 2012 — BQE Software Inc., a world leader in time tracking, billing and project management software, announced today the immediate availability of BQE ArchiOffice® 2012. This latest release of ArchiOffice has been totally rewritten from the ground-up, taking advantage of forward-looking technologies such as HTML5 and CSS.

This new platform provides noteworthy benefits to the customers including significant improvements in speed, while being platform and device agnostic. Furthermore, it is paving the way for BQE to develop future tools that will give architects and other professional service firms a competitive advantage.

“We love taking bold steps at BQE,” said Steve Burns, FAIA, Director of Product Strategies at BQE. “The new, modern ArchiOffice will provide unparalleled productivity and flexibility for our customers. Not only have we carefully listened to their needs and delivered on them, but with ArchiOffice 2012 we’ve constructed the foundation that will allow us to achieve our strategic vision.”

ArchiOffice 2012 key features include:

Any Device, Anywhere, Anytime. ArchiOffice 2012 can be accessed from any device irrespective of its operating system or form factor including iPhone®, iPad® and devices running the Android operating system.

Documents at Your Fingertips. Once logged into ArchiOffice, you have full access to all project documents even while you are out of the office.

Smarter Timecard. Building on previous timecard intelligence features, the timecard now knows which projects have tasks for the user to select from and which projects will want the employee to enter in their own notes.

Fewer Billing Steps. Managers can now gauge the completion of a project by using the Estimation feature that analyzes the pending tasks and applies an estimated level of completion. This increases a firm’s ability to accurately invoice clients based on a quantifiable level of completion.

Robust QuickBooks Integration. Totally rebuilt and enhanced, QuickBooks integration includes a new Smart Match utility allowing users to intelligently match ArchiOffice records and transactions with QuickBooks.

Availability

New and upgrade versions of ArchiOffice 2012 are now available for worldwide purchase through BQE Direct Sales and BQE Authorized Resellers. For additional information, edition comparison and screen shots,
